

Assoc. Prof. Dr. Zdeněk Hadaš

Brno University of Technology, Czech Republic

Zdeněk Hadaš was born 1980 in Vsetín, Czech Republic. He completed his Master's degree in Mechatronics at Faculty of Mechanical Engineering, Brno University of Technology, Czech Republic in 2003. He is involved in research on mechanical energy harvesting, focusing on generating of electricity from vibrations. He defended his Ph.D. thesis with topic vibration energy harvesting in 2007 at Brno University of Technology, Czech Republic. He received title Associated Professor (docent) in 2015 at the same University. He has published over **80** papers including about **20** in international journals. He is author of **3** patents in energy harvesting applications. He is actively collaborating with researchers from other Institutes under national and European projects.
