

Special Session on

Multilevel Converters: Topologies, Modulation and Control Strategies, and their Applications

Multilevel Converters have been experiencing, in terms of research and applications, a continuous and increasing growth during the last two decades. The effort of the researchers and industry has led to a rapid development of different multilevel Converter topologies, modulation techniques and control strategies. In addition, other interesting research topics such as the fault tolerant operation, efficiency improvement, optimized control strategies and new applications are also important. We encourage all researchers working in this area to submit papers to this Special Session.

Topics of interest include, but are not limited to:

- ✓ New Multilevel Converters Topologies
- ✓ New Modulation and Control Strategies for Multilevel Converters
- ✓ Multilevel Front End Converters
- ✓ Novel Multilevel Inverter Topologies
- ✓ Multilevel Converters for Renewable Energy
- ✓ Common Mode Voltage Reduction Methods in Multilevel Inverters
- ✓ Fault Tolerant Design of Multilevel Converters
- ✓ High Efficiency in Multilevel Converters

Special Session Organizers

Nil Patel

Power Electronics and Drives Department, Research and Development Centre,
Cismac Solution Pvt. Ltd., Gujarat, India.

Partha Sarathi Subudhi

Ph.D. Research Fellow, School of Electrical Engineering,
Vellore Institute of Technology, Chennai, India.

Rakesh Kumar A.

Ph.D. Research Fellow, School of Electrical Engineering,
Vellore Institute of Technology, Chennai, India.

Prof. D. P. Kothari

Department of Electrical Engineering,
Visvesvaraya National Institute of Technology (VNIT), Nagpur, India.

Prof. Jens Bo Holm-Nielsen

Department of Energy Technology, Aalborg University, Esbjerg, Denmark.

Prof. Sanjevikumar Padmanaban

Department of Energy Technology, Aalborg University, Esbjerg, Denmark.

Important dates

Full Paper Submission :	12 May 2019
Notification of acceptance :	31 May 2019
Final Submission of Full Manuscript :	30 June 2019
